

# Viewing Wound Images using Zero Footprint Viewer

Wound photos are digital!  
Nurses take photos of wounds on admission and periodically as needed.

Access the ZFP Viewer from the SSO toolbar (Add in Button Manager)

- Search for patient using MRN patient identifier
- Images will be available on the timeline to the left of the screen in reverse chronological order.
- Review identifying image information collected on the phone at the time of image capture.
- Images import into the final chart after patient discharge. (Note: images taken in Mobile Heartbeat texting app are only temporary and not a legal part of the patient record)
